Enclosures: 1. Report on Meeting
 2. S. Rothman's Notes and Charts
 3. Committee Directory as of 2/10/59

Gentlemen:

As decided at the Denver meeting, the next session of the committee is tentatively scheduled for May 25 and 26 at ITEK at Boston, Mass. This will be confirmed later after consideration by Drs. Greenstein and Tompkins.

The following agenda items were agreed upon:

1. A review of subjects appropriate to a research program in support of WS-117L including those on the RADC List of R&D Problems.
2. Presentation by Major Wienberg of the ARPA-approved development program.
3. Presentation of WS-117L requirements (if it can be arranged by Lundahl).
4. Further discussion by S. Rothman of the central data processor. This should include the following:
 - a. current estimate of inputs
 - b. transient analysis of queuing theory
 - c. qualitative information retrieval
 - d. compilation of summary
 - e. plans for simulation

5. Discussion by Katz concerning a standby data processing system that could be used in emergencies.
6. Progress report by ITEK.

The following are tentative agenda items:

7. Major Wienberg will try to arrange for a status report by T-R-W. An outline will be precirculated to committee members within the next month or so. The report would include an estimate of the volume of traffic that each of the systems interfaces.
8. Dr. C. B. Tompkins will try to arrange a committee presentation by a member of NSA.

Amron Katz agreed to arrange with RADC and ARL to present related developments under their cognizance to the committee at some future meeting.

Please note that Major Wienberg requested that TOP SECRET clearances be forwarded by all committee members to BMD.
